

What is claimed is:

1. A decorative structure comprising:
a panel having a first face and a second face;
a support structure aligned adjacent said second face of said panel; and,
a clip fastening said support structure to said panel and extending along a portion of said first face of said panel.
2. The decorative structure of claim 1, wherein said clip comprises a convolute retainer, wherein a portion of said convolute retainer extends along said portion of said first face of said panel.
3. The decorative structure of claim 1, wherein said panel is maintained in a flexed configuration.
4. The decorative structure of claim 1, wherein said support structure includes a first member having a keyed aperture.
5. The decorative structure of claim 4, wherein said first member is curved.
6. The decorative structure of claim 4, wherein said support structure further includes a first cross member disposed in said keyed aperture.

7. The decorative structure of claim 6, wherein said support structure further includes a second cross member disposed in said keyed aperture and interconnected to said first cross member.

8. The decorative structure of claim 7, wherein said first cross member and said second cross member are curved.

9. The decorative structure of claim 7, further comprising an intersection clip engaging said first member, said first cross member and said second cross member.

10. The decorative structure of claim 1, wherein said support structure comprises intersecting members and an intersection clip maintaining said intersecting members in position within said decorative structure.

11. The decorative structure of claim 10, wherein said intersection clip comprises two achiral halves.

12. The decorative structure of claim 10, wherein said intersection clip comprises a convolute saddle member.

13. The decorative structure of claim 1, wherein said clip comprises a major leg engaging said support structure.

14. The decorative structure of claim 13, wherein said clip comprises a minor leg engaging said support structure.

15. A decorative structure comprising:
a panel; and,
a support structure connected to said panel, said support structure comprising a first member having a keyed aperture, a first cross member disposed in said keyed aperture and an intersection clip engaging said first member and said first cross member.

16. The decorative structure of claim 15, wherein said support structure is connected to said panel by a clip.

17. The decorative structure of claim 16, wherein said clip comprises a convolute retainer extending along a face of said panel.

18. The decorative structure of claim 16, wherein said clip comprises a major leg engaging said support structure.

19. The decorative structure of claim 18, wherein said clip further comprises a minor leg engaging said support structure.

20. The decorative structure of claim 16, wherein said intersection clip comprises two achiral halves.

21. The decorative structure of claim 16, wherein said intersection clip comprises a convolute saddle member.

22. The decorative structure of claim 15, wherein said panel is maintained in a flexed configuration by said support structure.

23. The decorative structure of claim 15, wherein said first member is curved.

24. The decorative structure of claim 15, wherein said first cross member is curved.

25. The decorative structure of claim 15, wherein said first cross member is interconnected to a second cross member disposed in said keyed aperture.
